Professional Summary

Pragmatic and motivated aspiring developer with a passion for building practical solutions. I am eager to apply my acquired skills and knowledge to real world problems. I take pride in my work, and I aim to build solutions that provide the best value. I value continuous learning not only for my own development but also to contribute more effectively to any team or project I am part of. I aim to be a well-rounded full stack developer and am committed to grow my knowledge on both frontend and backend technologies.
